Aerodactyl

By PODragon

Build by LuIS

9

8

7

Start at the mouth and
build following the numbers
around it. Fold the indicated
lines. Glue the teeth to the
mouth BEFORE joining it
to the head.

Close the model at the tip of the tail. Fold the indicated lines and glue the sides together.

You MUST reinforce the inside where the wings connect to the body. Glue some layers of scrap paper there after piece 30 is glued.

51

49

50

Start the wings at the tip, gluing
both sides together.

17

27

The claws can be
complicated,
so take your time
there. Use of
tweezers will also help here.

41

35

34

39

33

38

Start the legs by the
toes and build up.
Glue them to the body
BEFORE going to the
tail.
