

Zapdos

by Brandon

Build by Skeleman

Left Wing

Right Wing

Left Back Wing

Right Back Wing

Glue the back wings onto the body
in the order indicated by the numbers

Outer Skirt

Outer 'Skirt'
Inner Piece

Inner Insert
Outer side

Inner Insert
Inner Side

Left Leg

Build the toes first, attaching the rest of the foot moving towards the body. Once the brown parts are attached, be sure the yellow leg stubs (55-56, 44-45) are attached to the body, and then glue the brown parts over them.

-Build the yellow cones-
and attach to the body.
Afterward, glue the
orange and brown
parts of the legs to
the cones.

Base

68

Base simply rests on the flat inner face of the 'tail', where the black insert and yellow insert connect
